

DNREC's Division of Parks & Recreation extends deadline for Fenwick Island State Park Improvements Survey

FENWICK – DNREC's Division of Parks & Recreation has extended the Fenwick Island State Park Proposed Improvements Survey deadline to Jan. 15, 2020. The extension is to allow further input regarding improvements to the park that are under consideration.

The estimated \$18 million in proposed improvements look at ways to improve traffic flow, upgrade infrastructure, and add new recreational amenities. Ørsted, an offshore wind developer, has proposed funding these projects as part of a public-private partnership.

The funding for the amenities under consideration could be done sooner if the State allows the Maryland Skipjack Wind Farm project proposed in Federal waters to connect to the electrical grid under Fenwick Island State Park. DNREC is extending the period to take comments on the park improvements. Comments on the wind farm should be directed to United States Bureau of Ocean Energy Management (BOEM) Office of Public Affairs at BOEMPublicAffairs@boem.gov, 202-208-6474 or 1849 C Street, NW, Washington, D.C. 20240.

The Fenwick Island State Park Proposed Improvements Survey and its comment section are specific to the park and its amenities. For questions or to complete the survey, visit www.destateparks.com/FenwickImprovements.
